SPLENDID Hardy Everywhere PEONIES

"ARISTOCRAT OF FLOWERS"

THE wonderful improvements made during recent years in these old-fashioned hardy plants has brought them into renewed popularity. The gorgeous flowers, which rival the finest Roses in size, form and color, are produced in great abundance. After once being planted they require little care and attention, thrive anywhere, and are absolutely hardy even in the coldest climates; each year after planting they grow into greater value, producing more and more flowers. They are not troubled with insect pests. Try some of our fine Peonies, and see what grand flowers they are. Get it out of your head that there are only Red, White and Pink Peonies to illustrate at flowering time. People who visit our field will say, "I have Pink and White Peonies. I desire only Red ones," but when they are shown the Pink and White, they invariably exclaim, "How grand! I have none like them. There is as much difference in Peonies as there is in Roses."

"PEONIES FOR PLEASURE"

This book of "Peonies for Pleasure" gives you information on "Peony History," "Nomenclature," "Six Points of Excellence," "A Month of Peonies," "The Lure of the Peony," "An Appreciation," about Peony culture, soil, drainage, fertilizers and how to apply; planting time and how to plant; varieties for cut flowers; how to grow exhibition flowers. This book describes over two hundred of the choicest kinds. If you want information on the plant that stands next to the Rose in beauty, that is practically known to the amateur as simply a red, white and pink Peony, then send today for "Peonies for Pleasure."

Time to Buy Peonies During the Fall Season

The proper time to buy and plant Peonies is from September 1st until the ground freezes up. The plants we offer are field-grown divisions with two to five or more eyes, commonly known as one-year plants.

For Peonies, both old and new varieties, not named in this Catalogue, see "Peonies for Pleasure." Write today for it.

THE CREAM OF THE PEONIES

You may order by the number preceding the varieties or by name, or better still, in ordering use both number and name. For full and complete description of these Peonies send for our booklet, "Peonies for Pleasure." It is mailed free. It also describes and prices over a hundred other choice kinds, both new and old, that are not named in this catalogue. Send for it today. All Peony roots here offered are known as Divisions. THE CREAM OF THE PEONIES—Continued

110—GLOIRE DE CHARLES GOMBAULT (Gombault, 1866)—We have no hesitancy in saying that this is the best of all the tricolor varieties. The colors are as well defined and clear cut as a cameo, beautiful. Rose and creamy-white with shades of salmon-yellow. \$1.25.

3—HUMEI (Anderson, 1810)—Very large, compact, pink flower with delicious cinnamon fragrance. 50 cents.

100—JAMES KELWAY (Kelway, 1900)—Very double and full, borne in immense clusters. Color pure white overlaid with a flush of delicate bridesmaid-pink, tinged yellow at the base of the petals. Extra fine. \$2.00.

46—JENNY LIND (Burr)—Large bloom on long stems, free bloomer, color deep pink with silvery reflex. A most striking variety. 60 cents.

400—JUBILEE (Pleas, 1908)—One of the largest and purest white Peony flowers ever raised. This took the sweepstakes prize at the New York show in 1917 for the best flower in the show over all comers. It is peculiar in its shape, the petals are some short and some long, and placed in such a way as to give the impression of a five-pointed star. A most wonderful variety. Stock is very scarce. \$15.00.

542—JUDGE BERRY (Brand, 1907)—This we think is one of the great Peonies; ground color white, washed with a soft delicate pink of the largest size, often seven to eight inches in diameter. \$10.00.

175—JULES CALOT (Calot, 1861)—Large, rather flat flower, dark carmine-pink with a pronounced silvery reflex, free bloomer. \$1.00.

270—LA COQUETTE (Guerin, 1861)—Guards are wide, of a bright rose-pink, with a fringe of narrow petals of a lighter shade surmounted by a crown of wide petals of a rose-pink. 60 cents.

300—LADY ALEXANDRA DUFF (Kelway, 1902)—Here we have a beauty, in fact we have no hesitancy in saying that "Lady Alexandra Duff" is the one outstanding Peony in our entire collection of over seven hundred varieties. That is to say, it has such great charm and beauty coupled with its many other good qualities as to stand out ahead of every known variety. When we say this we know exactly what we are saying. In the first place, every stalk grows upright, and it bears its flowers so that every single one looks at you. This is a most desirable quality. Then every petal of every flower is three inches or upwards across. Then the color is such a charming shade of pink, changing to white. There are many spurious kinds being sold. We guarantee our stock to be the true variety. We now have secured such a stock that we can sell at reasonable price. \$10.00.

THE BEST WAY TO GROW BULBS INDOORS

PLANT HYACINTHS in sandy soil, or make the soil porous with leaf mould secured from the woods. Plant the bulb bottom down, and push the bulb tight in the soil so that the top of the bulb is even with top soil. Use old four or five-inch pots—never new pots if you can avoid it. There are shallow, wide pots, made to hold three or more bulbs; they are satisfactory to plant in where only one variety is planted in a pot. Never feed the bulbs with manure—the power to flower is in the bulbs. A Hyacinth grown in water alone proves the truth of this. Give a good soaking after planting, and water once or twice a week if necessary during the time the bulb makes roots. Put the pots after planting—which should be done during September or October—in the ground, and cover the pot and all to the depth of three or four inches with soil. This is to prevent the roots from lifting the bulbs out of the pot. Or you can put them in the cellar where it is cool and dark. The idea is to have the bulbs kept cool and dark, so that the roots will start before the tops do. Cover up the ones outside with leaves or sawdust to the depth of six inches, as frost, if it reaches them, almost always results in injury to the flowers. After four weeks or so examine the roots, and see if they are down to the bottom of the pot; then bring the ones you want to flower early into a dark place where the temperature is from fifty to seventy, but keep them dark by covering them up or placing them in a dark cupboard. They can be left outdoors or in the cellar if you do not want them so early, until the sprout is as long as a man's finger. This brings them in later, but is the surest way to get fine flowers, as it is more natural than to force them quickly. When the sprouts have reached the length of a man's finger they may then be exposed to the light. If brought to the light sooner the result will be that the top bells will open first, and then the flower is spoiled, for the top bells will be faded before the lower bells open. The sprouts are yellow by keeping them covered, but that does not matter, as they turn green quickly when brought to the light.

Tulips and Narcissus are treated the same as Hyacinths, except that when brought in from outdoors or the cellar they can be placed in the full light at once. Instead of pots you can use grape baskets.

REMEMBER that the foregoing Twelve Hyacinths are the very best in cultivation. Get them, and you have the best.

LA VICTOIRE—This is a bright red Hyacinth of the greatest merit. The color is a rich, even shade of bright red. Superb.

LADY DERRY—This is said by all who have seen it to be the best dark rose-colored Hyacinths yet offered. The florets are extra large. Spike solid and compact and of immense size, and the fragrance is delicious. The color is a rich, deep rose, very bright and distinct. Elegant.

SIR WILLIAM MANSFIELD—This is the rare color in Hyacinths, being a most beautiful shade of lilac or violet. When you see this in flower you will always remember it.

KING OF THE BELGIANS, "Roi des Belges"—So many persons complain that they never get a bright red Hyacinth. The color of this grand variety is a rich, glossy ruby-red of the brightest hue. Certainly a gem.

KING OF THE YELLOWS—A very pure yellow color, one of the richest and best; none better.

QUEEN OF THE BLUES—In Holland the delicate blue Hyacinths take precedence over all other colors, and the blue varieties in this collection cost much more than any other color. With Czar Peter this variety is a sure enough rival. It does not conflict with any of the other blues in this collection, being entirely distinct, a delicate porcelain-blue, a color that is extremely rare in flowers of any kind. Extra fine.

Five Beautiful Roman Hyacinths

We wish to call special attention to these beautiful Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Years. Each bulb throws up several spikes of flowers, which are very beautiful and fragrant, and when kept in a cool room will keep perfectly for weeks. Three can be planted in a four or five-inch pot, and will soon be in flower. In the garden they are the first of all Hyacinths to bloom. We offer extra large bulbs. The new double ones are exceedingly fine. Do not fail to plant a good lot of them for winter.

CANARY YELLOW—Few novelties have come out recently which will in importance surpass this new yellow Roman Hyacinth. There is nothing to be said of it except it is like the common Roman white, except in color, which is a lovely shade of light yellow. 10 cents each; four for 35 cents.

PINK—A grand new sort with enormous bright deep bells in large spikes. 10 cents each; 4 for 35 cents.

RED—A beautiful shade of deep red, very bright and penetrating. 10 cents each; four for 35 cents.

SPECIAL OFFER—For only 40 cents we will send one bulb of each of these five Roman Hyacinths; three of each for \$1.00.

MIXED HYACINTHS—For Bedding Out in the Fall

These Mixed Hyacinths are used almost exclusively for bedding out in the fall on account of their cheapness. They are just as good colors and just as fragrant as the named varieties; the difference is in the cost of keeping the named sorts separate, both while planting and after they are dug. The exact shades cannot be given, but the general outline of colors are kept separate, so that in ordering you know what color you are buying. 15c each, or the entire twelve choice colors for \$1.50; any six for 65c.

Early Flowering Double Tulips

These Tulips have massive flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties, and in consequence when singles and doubles are planted in conjunction the "time of the Tulips" is greatly prolonged. Double Tulips are beautifully adapted for beds on the lawn, in the garden, and for mingling in clumps of half a dozen or more around the edge of shrubbery. They are robust growers and exceedingly effective. The early sorts do splendidly when grown in pots for winter blooming, but must be forced much slower than Single Early Tulips, by keeping them cooler. **Price, 6 cents each, or the set of 26 distinct kinds of Double Early Tulips for \$1.40.** Those preceded with a star are the best varieties for forcing indoors.

Early Flowering Single Tulips

Those marked with a star are the best for forcing in the house, but all Tulips are fine for garden culture.

Tulips are such universal favorites that it is scarcely necessary to expatiate upon their merits here. Their ease of culture, combined with beauty of form and gorgeous coloring, render them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable. The Tulip is extremely hardy and of easy culture, flowering as freely in the shade as in the sunshine and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. In gardens where the flower beds

must be kept gay from the earliest day of spring, plant between the lines of Tulips, Scilla Sibirica, Chionodoxa Luciliae, Snowdrops or Crocus, and as these flower first they can be removed or cut down when the Tulip is coming into bloom. The Single Tulip has a greater variety of rich, delicate and attractive colors than any other selection of spring flowering bulbs. The Single Tulip is extensively grown for indoor decorations, three or five bulbs in a pot.

The Chinese Sacred or Oriental Narcissus

A Variety of Polyanthus Narcissus

The "Shui Sin Far," or Water Fairy Flower, Joss Flower, or Flower of the Gods, etc., as it is called by the Celestials, is a variety of Narcissus, bearing in lavish profusion chaste flowers of silvery-white with golden-yellow cups. They are of exquisite beauty and entrancing perfume. It is grown by the Chinese according to their ancient customs to herald the advent of their new year and as a symbol of good luck. The bulbs are grown by a method known only to themselves, whereby they attain great size and vitality, insuring luxurious growth and immense spikes of flowers. In fact, the incredibly short time required to bring the bulbs into bloom (four to six weeks after planting) is one of the wonders of nature. "You can almost see them grow," succeeding almost everywhere with everybody.

They do well in pots of earth, but are more novel and beautiful grown in shallow bowls of water, with enough fancy pebbles to prevent them from toppling over when in bloom. A dozen bulbs started at intervals will give a succession of flowers throughout the winter. We are importing direct from China immense bulbs of the true large-flowering variety. Price, 25 cents each; three for 65 cents.

Chinese Sacred Lily.

Winter Blooming Freesias.

CROCUS

That Bloom in the Spring

For garden culture plant bulbs two inches deep and two or three inches apart. They are so cheap and pretty they ought to be found in every garden in abundance. They bloom splendidly when planted on the lawn among the grass. They lift their bright heads up through the sod very early, and give the lawn a charming aspect. The sorts we offer are especially strong and fine. **Price, 50 cents per dozen; \$3.50 per hundred.**

Winter-Blooming Freesias

PURITY—No description can do adequate justice to this beautiful plant. The flowers are two inches long and about the same in width, shaped like miniature Gladioli, and borne in clusters of six to ten on depressed horizontal scapes. The body of the flower is pure white, with lower segments spotted lemon-yellow. The perfume is most delicious, being a mixture of Mignonette, Violet and Jasmine, and one plant is sufficient to perfume a large room without the overbearing perfumes of Hyacinths or Tuberoses. The plant has tooth-shaped bulbs and flat, spreading leaves. Its cultivation is the simplest, requiring only to be potted in October, to be watered sparingly at first, placed in a sunny window, and watered more as growth progresses. When out of flower, store in some place, and repot at proper season in fresh soil for another year's growth. **6 cents each; 65 cents per dozen.**

Lilium Giganteum

THE TRUE BERMUDA EASTER LILY

This peerless Lily is the greatest acquisition to floriculture made in many years. Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter, and other special occasions, make them invaluable. Flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. A short time only is required to bring them into bloom. Bulbs potted in August can be had in flower in November if desired. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals during the winter. The quantity of bloom produced is marvelous. Blooming plants in pots form typical Easter offerings and presents, for decoration of window, table, house or church. As a garden Lily it is of great beauty, being entirely hardy except in Northern climates, where it requires a protection of leaves or litter to the depth of five or six inches. **Price, 40 cents each; three for \$1.00.**

Crocus Vernus—The First Flower of Spring.

THE CREAM OF THE NEW ROSES

We here offer what is good in the new Tea and Hybrid Tea Roses. To have what is good you must try these Roses. They are the best that England, France, Ireland, Italy, Holland and America can produce.

Price, 25 Cents Each, Except Where Noted.

WE HAVE NO TWO-YEAR-OLD PLANTS OF ROSES TO OFFER THIS FALL. WE WILL HAVE THEM NEXT SPRING

COLUMBIA (H. T.)—This is a new American Rose, grown by the veteran rosarian E. G. Hill. It is a very vigorous grower of a true pink shade, deepening as it opens to glowing pink. A peculiarity of this variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring.

COUNTESS CLANWILLIAM (H. T.)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high, centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY (H. T.)—This is the Crimson Chatenay, a great Rose. All know the Mme. Abel Chatenay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN (H. T.)—A very strong, upright grower, flower large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

CRUSADER (New.) A big, strong growing variety, robust and rugged in every characteristic. The growth is heavy and the flower stem strong and heavy. It is free flowering and the blooms are big and double and in color a rich velvety crimson. A free flowering red Rose that is a wonder. **50 cents.**

FLORENCE FORRESTER (H. T.)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white; the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (H. T.)—It is very fitting that such a fine new Rose should be honored with the name of the author of the "Star Spangled Banner," and also that it should hail from Baltimore, one of whose forts was being assailed when the inspiration came to the author to write our national anthem. The flowers are from large to very large, with sixty or more petals opening to a high center. The color is a magnificent deep red rose. Wherever it has been staged this Rose has swept all competitors from the boards and secured every prize it has entered for. Grand for the garden.

FRANK W. DUNLAP (New.) Did you see it at the International Flower Show at New York the past spring? Its record at the exhibition, winning silver medal for the best new pink Rose, gold sweepstakes medal for the best seedling in the show. Frank W. Dunlap was the finest flower in the exhibition. Claimed to be better than Mrs. Charles Russell. **50 cents.**

GLADYS HOLLAND (H. T.)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (H. T.)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (H. T.)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

HADLEY (H. T.)—In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well

Autumn Tints.

formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HOOSIER BEAUTY (H. T.)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thorough established in the soil sends out long, stiff growths with a bud on every shoot."

HENRIETTE (H. T.)—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

KILLARNEY BRILLIANT (H. T.)—The introducers are to be congratulated 16 years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

THE CREAM OF THE NEW ROSES—Continued

LADY PLYMOUTH (T.)—The color is a pearly, delicate but deep ivory-cream, faintly flushed, giving it a most piquant finish that is difficult to describe. Awarded gold medal National Rose Society of England, and silver medal at Crystal Palace Show, London.

LADY ROBERTS (T.)—The color is a rich golden-yellow, very free bloomer and a grand garden Rose.

LOS ANGELES (H. T.)—Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops. **50 cents each.**

LILLIAN MOORE (H. T.)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow, deeper center; long buds; free bloomer.

MADAME BUTTERFLY—(New.) Is Hill's glorified sport of Ophelia. Seen and admired by thousands. All the color tones of Ophelia are intensified, making it a harmony of bright pink, apricot and gold. Ophelia ranks at the top in popularity and Madame Butterfly will surpass it. It averages more petals to the bloom; it produces more bloom to the plant because it makes more branches, everyone carrying a bud. The tight buds are a lovely shade of Indian oak, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color and of delicious fragrance. **50 cents.**

MADAME MARCEL DELANNEY (H. T.)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mock, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

Francis Scott Key (See description on page 19).

Lillian Moore.

MADAME COLLETE MARTINET (H. T.)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

MISS WILMOT (H. T.)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S. **35 cents.**

MR. P. L. BAUDET (H. T.)—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. BRYCE ALLAN (H. T.)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. CHARLES RUSSELL (H. T.)—This wonderful new American Rose has taken the country by storm. No other forcing Rose except "American Beauty" can compete with it when it comes to counting points. Stems three feet long, stiff and surmounted by grand rosy-pink blooms of the largest size and build. **35 cents.**

THE CREAM OF THE NEW ROSES—Continued

MRS. CAMPBELL HALL (Tea)—Delicate creamy-buff, edged or suffused rosy-carmine. The center of the bloom is warm cerise coral-fawn. Very deliciously fragrant. Awarded gold medal, N. R. S.

MRS. HENRY WINNETT (H. T.)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all the red or crimson varieties. The buds are long and well formed. A superb red Rose. 35 cents.

MRS. JOHN COOK—White, suffused with delicate pink, describes the color of this strong-growing, big-flowered daughter of Ophelia. The color varies with the season, the flush of pink being more pronounced during cool weather, while the Rose is almost white during the long days of bright sunshine. In bud it is nicely formed, the mature flower opening cup-shaped but expanding fully to a large and finely-formed bloom. It is bigger and better in summer than White Killarney and, with its delicate pink in dark weather, is a very charming color. 50 cents.

MRS. MACKELLAR (H. T.)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MURELLE (T.)—A Rose of the type of Safrano, only a much stronger grower. It is a very free bloomer and is a Rose with a great future. Color rosy-blush with saffron-yellow.

NATIONAL EMBLEM (H. T.)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

OPHELIA—Salmon-flesh shaded with rose, large, and of perfect shape; of excellent habit; the flowers standing up well on long, stiff stems and produced in great profusion. Excellent for forcing and a fine decorative variety. Growth vigorous. Certainly a glorious Rose. Be sure to have "Ophelia" fixed in your memory.

New Rose, Premier.

PILGRIM—(New.) In color, a beautiful shade of bright rose-pink. The bud, which opens perfectly, is long and of ideal form. Pilgrim is a Rose of good substance and petalage, and at any stage of development is perfect in color and form of flower. Its pronounced tea fragrance will attract all Rose lovers. It is prolific and highly productive of first quality blooms. The stems are straight and strong. It is the pink Rose to grow. 50 cents.

PREMIER—This is the long-looked for deep Rose for the garden; a beauty, and one you will be pleased with. It is a very free bloomer, almost smothering the plant. The color is bright and attractive. The growth is all that is to be desired, and altogether a wonderful Rose. 50 cents.

RED RADIANCE (H. T.)—All who know that grand Rose Radiance will welcome this red form of that great favorite. Radiance is a Rose that does well everywhere, a fine grower and free bloomer, and no prettier pink Rose grown. Red Radiance is its exact counterpart except that the color is a rich deep red.

ROSE MARIE (H. T.)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

TIPPERARY (H. T.)—In color stands between Lady Hillington and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

W. C. GAUNT (H. T.)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermillion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

Miss Wilmot (See description on page 20).

The "Excelsior" List of Ever-Blooming Roses

New and Choice for Outdoor Planting or House Culture

Price, 20 cents each; any three of your own selection for 50 cents. We have no two-year-old Roses to offer this fall. Will have plenty in our Spring book.

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and each succeeding year from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance; hardy everywhere in open ground with protection of litter, leaves, evergreen boughs or similar materials. Plant liberally of one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

Polyantha, or Baby Roses

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay. They are useful either pot grown or for bedding purposes or for hedge effect. 25 cents each.

ANNA MULLER—The pink Baby Rambler; always in bloom.

BABY RAMBLER—Completely hides itself all summer; bright red.

CATHERINE ZEIMET—The White Baby Rambler; extra.

MADemoiselle CECILE BRUNNER—This is the popular Baby Pink Rose. In the past year or two this Rose has fairly jumped into popularity.

It always was a popular outdoor Rose on the Pacific Coast, but recently even in the effete East and everywhere in America they are planting it simply by thousands for cut flowers. It has become quite the rage. It makes a handsome miniature Rose, coming in sprays of three to five buds, and combined in beautiful effect with so many other flowers in all kinds of floral work. It is a very prolific bloomer and if carefully protected in the winter should be a money-maker, both outdoors and under glass. The bud and flower are both handsome. Color, blush, shaded light salmon-pink; distinct and desirable.

MRS. WM. H. CUTBUSH—Flowers the delicate pink of Dorothy Perkins.

PERLE d'OR—Coppery-orange, changing to fawn.

New Polyantha, or Baby Roses Price 25 cents each

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY ECHO—The best Polyantha produced. Color rosy-flesh color. Of splendid strong growth and freedom of bloom, which are of wonderful keeping qualities either on or off the plant. This is the improved Baby Tausendschoen. It has more substance and more color, and is the best of all Baby Roses for pot culture. Be sure and try this one.

BABY TAUSENDSCHOEN, or THOUSAND BEAUTIES—Its flowers are large, so much like Thousand Beauties, that it has been rechristened Baby Thousand Beauties. It is a bush form of the Thousand Beauties, having all the charm of the variable coloring in its flowers that its parent has, being firm, white, delicately flushed pink, changing to deep rosy-carmine. A splendid Rose. Try it.

EDITH CAVELL—Bright crimson; white eye; very beautiful. One of the best new Baby Roses.

ETOILE LUISANTE or BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GEORGE ELGER—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class, it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

New Polyantha, or Baby Roses

Price, 25 Cents Each

GRUSS AN AACHEN—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

MLLE. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

ORLEANS—The showiest and prettiest of all the Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink, with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, making as a whole a charming combination that cannot be beaten. Color is irresistible. Plant grows like a weed and the flowers are nearly "immortelle" in their lasting qualities. Awarded gold medal.

ROSARIE, or PINK THOUSAND BEAUTIES—This is a bright pink form of that famous Rose, "Thousand Beauties." A grand Rose from any standpoint.

TIP TOP, "Baby Doll"—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll roses, a bench of "Baby Doll" being an even parterre of delicious color.

Baby Doll, or Tip Top.

ETOILE DE LYON—Still the best large golden-yellow Rose.

HELEN GOULD—A rich red Rose that is a great bloomer; the shade of red has been described best as a watermelon-red; elegant.

HELEN GOOD (The Beauty Cochet)—What the introducers say: "This is a true Cochet Rose, and after two years' trial in the garden we pronounce it as good if not better than any Rose for the garden ever sent out. We bought the entire stock of this Rose, paying \$1,000 for two plants, this being by far the highest recorded price ever paid for any Rose. The color is a delicate yellow suffused with pink, each petal edged deeper, very chaste and beautiful. The color, with its immense size and exquisite form, makes it without question the greatest Tea Rose ever introduced, and we are proud to have brought it out."

KAISERIN AUGUSTA VICTORIA—A grand white garden Rose that has stood the test of time. Full and double; fine buds and flowers.

LA FRANCE—This is claimed by many to be the queen of all the Roses; bright silvery-pink.

MAMAN COCHET (The Queen of all Garden Roses)

—Such beauty and exquisite form as is possessed by this variety is well-nigh marvelous, and cannot be seen in any other Rose we know of. The buds are beautiful, large, full and firm and elegantly pointed; as they expand they show great depth and richness, sometimes measuring two and a half inches from base to tip. Flowers superb when open, extra large, perfectly double and of splendid substance. Small pot plants will in the open ground quickly make large, strong bushes and produce, on long, stiff stems, great numbers of perfect flowers that are enchanting in fragrance and delicate brightness. The color is rich, clear pink, changing to a silvery-rose. As we see it, one good Rose like any of the Cochet Roses is worth a whole collection of poor ones.

SOUVENIR DE PRES. CARNOT—Grand Rose of the largest size; color delicate fawn or salmon; fine.

WHITE MAMAN COCHET (No Finer Rose Than This)—This Rose attracted our attention from the very first time we ever saw it in flower. It is of the largest size, and as you will notice, the flower is built up, or rounded, and very double. The color is a pure snow-white. Sometimes outdoors it is tinged pink, which only adds to its great beauty. No Rose surpasses it in vigorous growth and in the immense size of its buds and flowers—indeed, nothing in the Tea family approaches it in size. Deliciously fragrant.

WM. R. SMITH—This Rose has several names, such as Charles Dingee, Jeanette Heller, Maiden's Blush, etc. Color delicate blush. It has no superior as a garden Rose.

The New Hardy Climbing Roses

HARDY EVERYWHERE

ALIDA LOVETT—Both buds and flowers are large; are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter and more cheerful in color with larger flowers than those of the justly popular Dr. Van Fleet Rose. 35 cents.

AMERICAN PILLAR—The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches. They last in perfection a long time, and are followed by brilliant red hips of berries, which are carried late into the winter. 25 cents.

BESS LOVETT—Resembles Climbing American Beauty in shape of bloom, but is very much brighter in color and much more fragrant. The flowers are clear, bright red, of good size, and of double, full, cupped form, lasting a long time in good condition. Beautiful in bud and bloom and the most fragrant of the Climbing Roses. A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers. 25 cents each.

CHRISTINE WRIGHT, or PINK CLIMBING AMERICAN BEAUTY—This is identical with the Red Climbing American Beauty described next below this variety; flowers four inches in diameter; color bright, clear pink; immense. Try it; a fine companion for Climbing American Beauty. 25 cents.

CLIMBING AMERICAN BEAUTY—Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection. 25 cents.

GARDENIA (The Hardy Marechal Niel)—This grand Rose has proven itself hardy in Virginia and Tennessee. It is a deep golden-yellow of the largest size. 25 cents.

GOLDFINCH—A deep golden-yellow climbing Rose, called by some the Yellow Thousand Beauties; a glorious Rose. 25 cents.

PAUL'S CARMINE PILLAR—The earliest of the Climbing Roses to come into flower. Color a rich rosy-carmine with white eye. 25 cents.

PAUL'S SCARLET CLIMBER—The flowers of this superb Rose are vivid scarlet shaded with bright crimson. A gold medal Rose of England. A new shade in Climbing Roses. 35 cents.

RED DOROTHY PERKINS, or EXCELSA—The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces large clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all red Climbing Roses. 25c.

The plant is a strong grower, with large, glossy, bronze-green foliage. **25 cents.**

TAUSENDSCHOEN, or THOUSAND BEAUTIES—A Climbing Rose that comes to us from Germany. The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring. This Rose is sweeping the country like a prairie fire. **25 cents.**

VEILCHENBLAU (The Wonderful New Blue Rose)—This is a Rambler, and will thrive anywhere, being perfectly hardy. It has created a great stir in the Rose world, for the talk of a Blue Rose has been going on since time immemorial. It first opens a pink color, quickly changing to a decided violet-blue. GLADIOLI—Continued

***L'IMMACULEE**—Undoubtedly the best commercial white Glad in existence. Very tall spike well set with large flowers of great substance. Each, 10c; dozen, \$1.00; hundred, \$7.00.

***LOUISE**—Clear pure lavender of a bluish tinge; has no magenta or purple in it, and this makes it the finest lavender yet produced, nearly the same shade as Iris Pallida Dalmatica, which is enough said. Big flowers and a good grower. Each, \$1.00; dozen, \$10.00.

LOVELINESS—As its name implies this variety produces flowers of distinction in daintiness and beauty. The color is of pale creamy tone, soft and delicate, with a roseate tinge in the center. The flowers are large and well placed on the spike; and as a major part of these splendid blossoms are open at one time they make this variety superior for decorative effect. Each, 10c; dozen, \$1.00; hundred, \$7.00.

MADAME MONNET SULLY—Cream-white with red center. Extra fine. Each, \$1.00.

MAINE—A variety long looked for by both florist and grower. Its color is pure white; not the faintest spot or blemish can be traced on petals, throat, or the inside of flower. When in full bloom, the petals curl backward, reminding us of the lovely form that characterizes the Easter Lily. There are many flowers open at one time, and these blossoms, correctly placed on the stem, widely expended, tend to touch each other in the acme of blossoming, giving the impression as though this full row of snow-white cups were one long pyramidal flower. Unlike so many white Gladioli, Maine is an extremely strong grower and rapid multiplier, all first size corms producing two or three robust spikes with deep, green, healthy foliage. In conclusion, we wish to state that Glad. Maine is a crossing between Glad. Europe and Glad. Lily Lehman. Each, \$5.00.

***MAJESTIC**—Here is an orange shade that is new. It is not the orange of Alice Tiplady. This is wonderful, but a shade that has a tinge of salmon in it. Very difficult to describe, but a grand, refined color. Each, \$1.00; dozen, \$10.00.

MARY FENNEL—One of the patricians of the garden. Beautiful light lavender flowers on a tall, slender spike, lower petals primrose-yellow with penciling of lavender, perfectly exquisite and distinct. Especially recommended. Each, 20c; dozen, \$2.00; hundred, \$12.00.

MASTER WEITSE—Rich deep dark velvety purple of branching habit; tall, slender and graceful spike. Each, 7c; dozen, 75c; hundred, \$5.00.

***MAY**—An old favorite. White, heavily striped and splashed pink. Fine for forcing. Each, 6c; dozen, 60c; hundred, \$4.00.

MEADOWVILLE—White with lilac throat, a very pretty white flowering Gladiolus. Neat and prime in appearance. Petals reflex at edges. Each, 6c; dozen, 60c; hundred, \$4.00.

MISS CHRISTINA TREUER (New)—Sport of Halley. Has retained the earliness of this famous variety with this difference: It gives a soft rose colored flower without stripes or blotches. This is a wonderful flower of great beauty and we bespeak for it a glorious future. Each, \$4.00.

***MISS MAUD FAY**—Clean Cattleya-pink, a light stripe running through the middle of each petal. Flowers very open, averaging six inches in diameter. Spikes never straight, but curved in various directions; are three to four feet long. Exceptionally suitable for cut flowers. A fine production. Each, \$2.00.

MR. MARK—There are a number of new blues on the market and good ones, but none that can take the place of Mr. Mark. This variety is a charming blue color that does not wilt in the brightest sunlight, being a strong, vigorous grower and a wonderful color. Each, 35c; dozen, \$3.50.

MRS. DR. NORTON—Very large and well open flowers, well set on a tall and graceful spike, four to eight flowers in bloom at one time. Color, white, the edges suffused with soft La France pink. The three lower petals have a blotch of sulphur-yellow stained at the base with fine specks of Tyrian-pink. Strong and vigorous grower and very free flowering. Highest awards wherever shown. The flowers remind one of the rare and beautiful Regal Lily. The growth is tremendously tall and strong, and flowers are of extremely open form. Each, \$1.00; dozen, \$10.00.

MRS. FRANCES KING—Could we grow but a few varieties, Mrs. Frances King would be one of them. A most beautiful "Besnard shade" of

flame-pink. Flowers of giant size on a spike growing four feet high with from eighteen to twenty flowers. Six to eight open at one time. Beautiful under artificial light. A magnificent variety. Each, 5c; dozen, 50c; hundred, \$3.50.

Flowers are six inches in diameter and spikes four to five feet high. Each, 75c; dozen, \$7.50.

***MURIEL**—The most delicate shaded grayish-blue with eight to ten very fine formed flowers open at one time on a slender stalk, exceptionally placed. Each, \$1.00; dozen, \$10.00.

***MYRTLE**—The most beautiful pink yet produced in a Gladiolus. Clearest dainty ruffled rose-pink, softly dissolving into a throat of clear creamy-white, its cool angelic beauty is most entrancing. Early flowering; in perfect alignment on straight spikes, the opening buds very closely resemble creamy-pink tinted rosebuds with slightly flaring petals. Distinctive in form and color and of good size. "Myrtle" stands among the very elite of "Wizard" Kunderd's many exquisite productions. Each, 15c; dozen, \$1.50.

NEGERFUST—Brilliant velvety blood-red, flaked with black, inflamed with white and flaked lilac-rose, a very odd beautiful color. Long graceful spike. Best of the dark varieties. This variety must please. Each, 25c; dozen, \$2.50.

***PEACE**—Giant white flowers with lilac feathering in throat of two of the petals; flowers correctly placed on a tall, graceful spike. An extra fine variety. Each, 7c; dozen, 75c; hundred, \$5.00.

***PINK BEAUTY**—Pale carmine-lake, three lower petals forming rather large Geranium-red blotch. Orchid type. Ten days earlier than any other Gladiolus; invaluable for this reason for cut flowers and in great demand. Never can supply the demand. Each, 10c; dozen, \$1.00; hundred, \$7.00.

***PINK PERFECTION**—A true apple-blossom pink with immense flowers. The buds are so many and crowded so close together on the stalk that when it blooms is one mass of light delicate pink. The softness of coloring and the magnificent texture of blooms make it one of the choicest of the new varieties. Each, 15c; dozen, \$1.50; hundred, \$12.00.

Golden-salmon melting to throat of primrose-yellow, a color tone that either in sunlight or under electricity is extremely beautiful. "If I could have but one variety it would be Prince of Wales." ***SCHWABEN**—The strongest growing and largest flower of all the yellow Gladioli. A clear citron-yellow with Aster-purple tongue on lower petals. Buds sulphur-yellow. The name "Schwaben" was given this because the airship of that name passed over Paris the day the certificate of merit was awarded it. Each, 10c; dozen, \$1.00; hundred, \$7.00.

SULPHUR KING—This is by all odds the most valuable yellow variety ever introduced. It produces a very long spike of the clearest sulphur-yellow flowers yet seen in any Gladiolus. As it becomes known there will be a great demand for it, as it fills the need for a sterling yellow variety. Each, 35c; dozen, \$3.50; hundred, \$25.00.

SUNBEAM (Primulinus)—The best Primulinus type for unique decoration schemes. Color a rich self-yellow. No other markings; light and graceful. A variety that has come to stay. Each, 15c; dozen, \$1.50; hundred, \$12.00.

Primulinus Hybrids

These hybrids, gained by crossing the species Primulinus with the larger varieties of the Gandavensis type, have retained all the daintiness and graceful form of their Primulinus parent, even to the "hood" formed by the drooping of the upper petal, and have an added beauty of exquisite coloring, from the softest primrose to a beautiful rose. BEAUTIFUL HOUSE FERNS

There are no plants grown that are more desirable for the house than the following fine decorative Ferns. They are easily grown, free from insects and disease, and thrive well in the ordinary temperature of the living room. See that the plants have plenty of drainage and are kept well watered; never let dry out for any length of time. Everyone of these *Nephrolepis* Ferns is entirely distinct in every way. That we are headquarters for Ferns is evidenced by the choice assortment that we offer. No other firm offers so many distinct and choice varieties. Try us for Ferns.

New Liberty Fern.

THE "TEDDY JUNIOR FERN"

Nephrolepis Teddy Junior

"Teddy Junior," the Fern for every household. This grand Fern was introduced recently by G. & R. The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot. **Fine young plants, 35 cents; strong plants, 75 cents.**

THE "ROOSEVELT FERN"

Nephrolepis Roosevelt

It is our good fortune and great pleasure to offer this wonderful new Fern, having introduced it in 1910. In this short time it stands second in popularity of all the Ferns, and will soon be more popular than even the old favorite Boston Fern. In general characteristics it resembles the world-famous Boston Fern, but it will sweep that Fern from the boards for two reasons; it produces many more fronds than the Boston, thus making a bushier, handsomer plant; then the pinnae are beautifully undulated, giving the "Roosevelt" a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. A charming and most notable variety. **Fine young plants, 35 cents each; strong plants, 75 cents.**

Fronds of the "Roosevelt Fern."

New Fern Liberty

This is our own production. In the past we have sent out Baby's Breath, Teddy Junior and Roosevelt, the three greatest Ferns today, acknowledged so by all plantsmen and flower lovers, and now we add another one to the galaxy, "Liberty," no doubt the best of them. All the fronds have finely divided pinnae that give them a very beautiful appearance, while the whole plant is overlaid with a bluish cast that makes of it a very striking object. Wonderfully beautiful, different from all other Ferns. First time offered. **Fine young plants, 50 cents each; strong plants, \$1.00 each. Be sure and try this beautiful Fern.**

"Teddy Junior" Fern.

THE "Big Four Fern"

Nephrolepis Splendida

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of a "Fish Tail." Some fronds will be straight "Boston," others will be true "Roosevelt," in others the ends of the pinnae will be the feathery "Ostrich Plume," while in others the ends of the pinnae will be the genuine "Fish Tail." Then again some fronds will have in a marked degree all of these desirable traits, forming a combination without parallel among Ferns. It well deserves the name of "Big Four Fern." Everyone who sees it goes "dafty" about it. This is without question the most splendid of all the *Nephrolepis*. Be sure and try it. **Fine young plants, 35 cents each; strong plants, 75 cents.**

Beautiful House Ferns—Continued

The "Wannamaker Fern"

Nephrolepis John Wannamaker

A new Fern of wonderful beauty. Long, narrow, gracefully drooping fronds. It is not so compact as Scholzei, and, therefore, is a very airy and graceful Fern, and very durable in the house. A rapid grower; quite distinct from other Ferns. **Fine young plants, 30c; strong plants, 75c.**

The "Ostrich Plume Fern"

Nephrolepis Whitmanii

A great Fern. In fact, it is a plant that appeals to everyone, and on that account will prove a much more valuable and profitable plant than other Ferns of this class. Everyone who has seen it is charmed with it. As someone has expressed it, "There is nothing like the Ostrich Plume Fern in cultivation. In decorative effect it so far outdistances the original variety that there is positively no comparison to be made. We consider it the most valuable novelty that has been introduced in many, many years." It has taken gold medals wherever shown. **Fine young plants, 35 cents; strong plants, 85 cents.**

The "Newport Fern"

Nephrolepis Scotti

Of much dwarfier and bushier growth than the Boston Fern. The fronds droop gracefully, and are not as long and heavy as the Boston. It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a

John Wannamaker Fern.

14-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Fine young plants, 30c; strong plants, 75c.**

The "Parlor Fern"

Nephrolepis Whitmanii Compacta

This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent, the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed into one. Graceful beyond description. **Fine young plants, 35 cents; strong plants, 75 cents.**

Newport Fern.

The "Philadelphia Lace Fern"

Nephrolepis Elegantissima

The small size pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the midrib of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description. **Fine young plants, 35c; strong plants, 75c.**

The "Old Original Sword Fern"

Nephrolepis Exaltata

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the *Nephrolepis* we offer sprang. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. **Fine young plants, 25 cents; strong plants, 75 cents.**

Philadelphia Lace Fern.

Beautiful House Ferns—Concluded

The "Boston Fern"

Nephrolepis Bostoniensis

In the vicinity of Boston, no other plant is so extensively used as this graceful *Nephrolepis*, which differs from the ordinary Sword Fern in having much longer fronds, which frequently attain a length of six feet. These arch and droop over very gracefully, on account of which it is frequently called the Fountain Fern. This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. This Fern should not be compared with the Ostrich Plume Fern, as they are of an entirely different growth. Fine young plants, 30 cents; strong plants, 75 cents.

The "Crested Fern"

Nephrolepis Scholzei

The fronds are crested and stand erect, with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimen from becoming defective or yellow. Fine young plants, 30 cents each; large plants, 75 cents.

"Baby's Breath Fern."

The "Baby's Breath Fern"

Nephrolepis Goodii

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. It is an improved variety, and the best of its type. Nothing is daintier or more exquisite than well grown specimens in any size. Fine young plants, 50 cents; strong plants, \$1.00.

SPECIAL OFFER—The Fourteen Beautiful Ferns as named, costing \$5.30, for only \$4.50. The Fourteen Ferns in strong plants, costing \$10.35, for only \$9.00.

The "Fluffy Ruffles Fern"

Nephrolepis Superbissima

This new Fern is quite different from all other Ferns. Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth, much more compact, and its irregular shaped fronds, which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. The plant is very sturdy in its habit. Fine young plants, 75 cents.

(The Lace Fern.) This graceful climber has to a great extent taken the place of the once popular *Smilax* in all fine decorations. It is an excellent house plant, succeeding under almost any condition. 15 cents each.

Asparagus Sprengeri

(The Emerald Feather.) A most desirable species, especially useful to grow as a pot plant for decorative purposes or for planting in suspended baskets. Plant Sweet Peas south of the Ohio River in the fall. Try fall planting and be surprised. See our Spring Book for varieties. Everyone who has a yard ought to grow quantities of this sweetest of all flowers, that is not only a beautiful low-growing vine for garden and decorations, but one of the most useful of all in furnishing material for vases, bouquets and all cut-flower work. Plant quantities of these lovely flowers and cut them with a lavish hand; for every flower you pick, two will come to fill its place. For the largest and finest blossoms, dig a trench six inches deep, put in two inches of rotten manure, a little earth, and sow the seed over this three inches apart in the row, covering an inch and a half. Do this during the month of November, or just before freezing weather, and as the plants grow, fill up the trench around them with rich earth. The Ever-Blooming Butterfly Bush

Buddleia Variabilis Magnifica (Butterfly Bush)

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vieing with it in brilliancy of color. This shrub from a young plant set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often maintains a height of four feet. It produces long, graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable ma-

terials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. **Fine plants, 35 cents.**

Buxus

(Ornamental Box)

(*Sempervirens*)—Useful for edging and bordering walks, etc. A handsome shrub with deep green foliage. This is not as dwarf as the *Sempervirens* Nana, but we find it so much more vigorous and hardy that we advise planting this and trimming to height required. **20 cents each; \$1.50 per dozen, postpaid.**

Calycanthus Floridus

(Carolina Allspice or Sweet Scented Shrub)

A most desirable shrub. The wood is fragrant; flowers of a rare chocolate color, having a peculiar agreeable odor that is very penetrating. They blossom in June and at intervals afterwards. **Fine plants, 20 cents; strong two-year-old plants, 50 cts.**

Their fine habit, luxuriant foliage and profusion of bloom render them among the most beautiful of shrubs. They flower the latter part of June.

Hydrangea Paniculata Grandiflora

A great favorite, and there is nothing finer or more showy, whether for planting in large masses in parks or for single plants on the smallest lawns. Blooms profusely from July until frost, in immense white panicles, tinted with pink and then with brown in the fully matured flower. The plant should be cut back each spring fully one-half of the past season's growth, as the flowers are much finer if the plant is treated in this manner. The flowers are much finer and larger if grown in a good, rich soil, but the plant is so hardy and so easily grown that success is almost certain in any kind of soil and in any situation. **Young plants, 25 cents. Strong flowering plants, for immediate effect, two years old, 50 cents.**

Hardy Perennial Phlox

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

Price, 20 cents each; six for \$1.00. The entire set of Twelve Distinct Standard Varieties of Hardy Phlox for \$1.75.
